

Environmental Services

Bateman Litwin is firmly positioned in the fast-growing environmental protection industry worldwide.

The company provides enhanced environmental applications, including solid waste-to-energy plants, flue gas treatment plants, biomass plants and plant upgrades.

Bateman Litwin stands to benefit from favorable trends in these sectors due to increasing demand for electricity generation infrastructure and modification of waste incineration facilities to comply with environmental regulations, including the EU 2007.

Case Studies

Kashagan Power Plant

Bateman Litwin was awarded an LSTK contract for the design, supply and construct of a 270 MW cogeneration plant on the Kashagan oil field, Kazakhstan. The plant consists of four Gas Turbine Generators and Steam Turbine Generators.

Vitry, Paris

A 125MW cogeneration plant. Supplies both electricity and 400 t/h of steam (28 bar / 240°C) to an industrial zone in East Paris. A 16.5 months Turnkey project.

Sarcelles - Waste to Energy

A domestic waste incineration plant (municipal owner) with a capacity of 2 lines, 10 T, hr each and up to 100,000 tpa. The plant includes new furnaces and boilers & flue gas treatment with catalytic DeNOx in order to meet EU standards.

Bateman Litwin at a glance

Bateman Litwin focuses on mid-sized Energy EPC contracts, principally executed on a lump-sum turnkey (LSTK) basis. Bateman Litwin also provides technology solutions to the Phosphate Sector and Solvent Extraction Applications.

Backed by an impressive track record of hundreds of projects in more than 40 countries, Bateman Litwin has established a reputation for excellence and on-time, on-price project delivery which maximize customer profitability.

Power

- Generation
- Cogeneration
- Trigeration
- Renewable
- Flue gas treatment
- Bio gas
- Waste to energy

Implementing a new power plant is not just about adding an energy generation resource, it's about giving it a profitable, competitive edge. Reaching this point involves traversing a long, challenging path. To excel on this course, you need more than a vendor, you need a partner.

This teammate must be willing to invest maximum attention to steering your project, to ensuring that it is completed on time, within budget and with the best technology. Your partner must demonstrate potency, experience and know-how through all project stages.

Bateman Litwin, a leading international turnkey and EPC solution provider, operates in all aspects of the Power industry. Leveraging the latest technologies with a world-class, multidisciplinary staff, Bateman Litwin delivers high quality power generation and renewable energy projects. Total commitment, high efficiency and strong cultural affinity make Bateman Litwin an ideal partner for your next project.

Bateman Litwin's
range of services

Knowing your market first hand

With its extensive experience world wide and with local offices in every target market, Bateman Litwin has a global perspective on the power and energy marketplace. Our familiarity with local markets further enhances this unique standpoint.

Mostly indigenous to project locations, Bateman Litwin's workforce is well-equipped to tackle local challenges. We are proud of our proven ability to manage projects in remote places, harsh conditions and complicated geo-cultural environments.

Accumulated Experience

Bateman Litwin's power and energy division has designed, constructed and commissioned numerous power stations ranging in size and capacity, plants that include gas turbines and combined cycles, as well as conventional steam plants utilizing coal, oil and natural gas fuels.

A winning combination between highly experienced professionals and a well proven record enables Bateman Litwin to offer an optimized solution for its clients.

Tailor-made solutions and flexible services

Bateman Litwin offers a comprehensive array of design and construction services. This broad scope of solutions provides maximum flexibility in choosing what best suits your project's needs.

Bateman Litwin enables you to select only those services you require for an optimized, high quality and cost effective project.

Whether you need a small utility plant, an independent power station or an advanced energy solution, you can benefit from Bateman Litwin's single-source responsibility throughout all aspects of your project, from concept to turnkey.

Flexible technologies

Over the decades, Bateman Litwin has established relationships with key vendors and co-suppliers around the globe. The ability to offer an optimized blend of local equipment and the latest technology gives a true benefit for our clients. This approach brings an obvious advantage together with a significant costs reduction.

With an overall commitment to our clients, Bateman Litwin is a solution provider unchained to specific products or technologies. With full independence and freedom from outside interests, we can choose those elements best-suited to your project.

Backed by a network of strategic alliances and major suppliers, Bateman Litwin offers the broadest and finest range of power generation systems, equipment and services in the industry.
